

Memo regarding the measure aiming to foster travels by train for LMD missions in Europe

According to the Climate Action Plan passed in November 2022, for all the missions in a European city located within 5h by train (from the place of departure indicated on EtamineMissions) and for all the missions within continental France, air travel is forbidden (unless a derogation is granted by the management). For rail journeys exceeding 3h, booking of 1st class tickets is allowed.

The table below lists the main cities for which this rule applies. They have been sorted by country and alphabetical order. This list is non exhaustive but covers most of the missions destinations from the previous years. The travel times have been estimated from station to station, leaving from Paris, with chronotrains.

Please note that cities in green are well connected to Paris by train but with a rail journey exceeding 5h. Air travel can thus be chosen but the use of train remains strongly recommended.

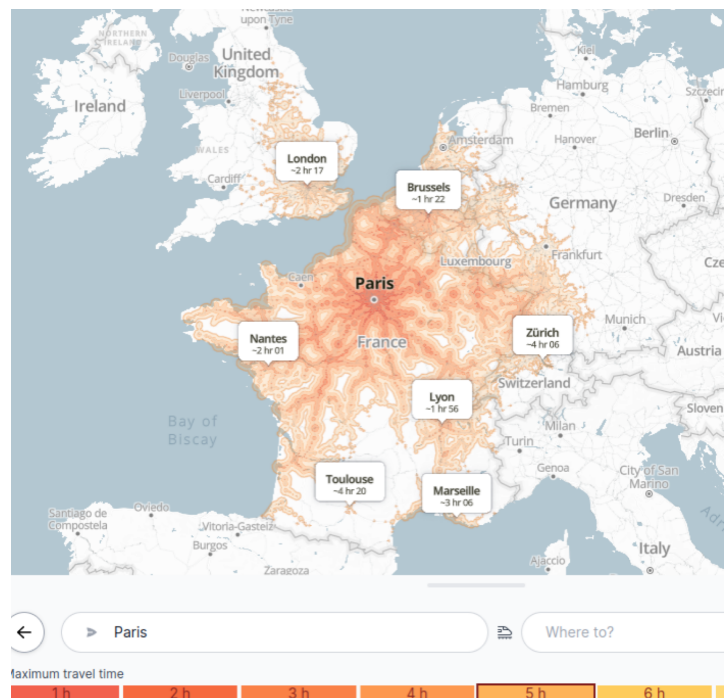

Booking of 1st class ticket is allowed

Air travel is forbidden (unless a derogation is granted by the management)

Air travel allowed
